ESSENTIALSPRO® - INVENTORY KIT ASSEMBLY®

The Inventory Kit Assembly module allows you to create kits (such as AC install kits) containing groups of inventory items. These kits can be posted to a job as a single unit, and in so doing, each individual part quantity is adjusted accordingly. Individual parts are reflected on detailed job reports

SET UP KITS

Assign as many parts (and associated quantities) as needed for each kit.

POSTING KITS TO JOBS

Easy detail view of parts assigned to a kit /assembly as you post.

REPORTING

Once kits have been posted to jobs, all standard inventory and job reports reflect detailed part history.
